

Old dominion University Computer Science Department Policies and Procedures

Title: Unix Software Upgrades

ID: CSU002

Revision: 1.0

Purpose

This procedure provides information on how we upgrade software on our Unix machines in the department.

Scope

This procedure applies to all software that is used in a production environment on our Unix machines.

Unix Software Upgrades

At the end of each semester, we will review the software installed on our Unix machines. We will then run a test environment with the upgrade versions of that software for faculty, staff, and users to test out. Once sufficient testing has been done and the faculty approve we will upgrade the software on our Unix machines.
